Norgine and Jubilant Announce Discovery Collaboration in Gastrointestinal Therapeutic Area

Bengaluru, India and Amsterdam, Netherlands, Oct 18th 2011:

Norgine, a leading European specialty pharmaceutical company and Jubilant Biosys Ltd., Bengaluru based subsidiary of Jubilant Life Sciences Ltd, an integrated pharma and life sciences company of India, announced today that they have entered into a discovery partnership. The collaboration, spanning an initial period of three years will provide a platform for Norgine to develop multiple targets utilising Jubilant Biosys integrated drug discovery platform targeting gastrointestinal diseases.

Under the terms of the agreement Jubilant will deliver preclinical candidates to Norgine who will own all rights to further development and commercialisation of the candidates.

Commenting on the collaboration, Sri Mosur, President and CEO, Global Drug Discovery and Development at Jubilant said: "Jubilant is very pleased to partner with Norgine, a very successful European specialty pharmaceutical company. We are confident our "accelerated discovery" platform will enable Norgine's quest for novel and optimal therapies in delivering affordable care to the unmet needs of patients in Europe and worldwide in the area of gastrointestinal disease".

Commenting on the collaboration, Ian Cox, Vice President of Pharmaceutical & Preclinical Development at Norgine said: "We are delighted to be collaborating with Jubilant, a company with a track record in these types of discovery programmes, and we genuinely look forward to a productive and fruitful relationship".

About Norgine

Norgine is an independent, successful European specialty pharmaceutical company that has been established for over 100 years and has a presence in all major European markets. In 2010, Norgine's net product sales were €258 million. The Company employs over 1,200 people.

Norgine's focus is the development and marketing of pharmaceutical products that address significant unmet clinical needs in therapeutic areas such as

gastroenterology, hepatology and supportive care. The Company currently markets a range of products in various markets in its key therapeutic areas e.g., MOVICOL[®] for the treatment of constipation and faecal impaction, MOVIPREP[®] a bowel cleansing preparation, KLEAN-PREP[®] for bowel preparation prior to colonoscopy, XIFAXAN[®] for the treatment of travellers diarrhoea and ORAMORPH[®] for the treatment of moderate to severe pain associated with cancer.

Norgine is active in research and development and currently has products in various stages of clinical development. Norgine manufactures most of its own products in Hengoed, UK and Dreux, France. For more information: www.norgine.com
